"We estimate the growth of the Russian consumer electronics market slowed

down to c.10% in Q1 2019, as a result of the market natural cyclical development and the economy stabilization. M.Video and Eldorado sustainably deliver double-digit sales growth on the back of the effective retail network supported by additional sales from stores opened in the end of 2018 and expected to ramp up during the whole 2019", - noted Enrique Fernandez, Chief Executive Officer of M.Video-Eldorado Group.

"We also see growing impact of the Internet on our shoppers, while maintaining traffic to our retail stores. About 70% of our customers use the Internet at some stage of choosing products, but at the same time, up to 95% of all transactions are completed in offline. In 2018, M.Video-Eldorado Group became the largest public e-commerce retailer not only in its segment, but also in the Russian market as a whole. That clearly proves that an effective retail network is an additional driver for online growth. Further digitalization of our business within One Retail strategy will allow M.Video and Eldorado to offer our customers not only favorable prices, but also the best service and shopping experience," - Mr. Fernandez added.

In Q1 2019, the Group increased its network by 14 stores net, including 5 M.Video, 7 Eldorado, and 2 m_mobile stores. The Group's total number of stores reached 955 as of March 31, 2019.
